XM Radio provides a great service that you can't get on regular radio stations (weather and traffic) along with many other services. As a truck driver this is a great service to me as well as to all concerned. I can find out about accidents before I get to them and detour myself around, so that I don't contribute to the problem. This also works with the weather in the winter, I can detour or stop before I hit ice or other unsafe conditions. So it becomes a life saver.

AM/FM stations do not give these real time reports and I can not find their stations in a timely manner to serve my needs.

I Pay for this service and they should not be Prevented from providing this to the driving public. We do not need Petition 04-260 Thank you.

James D. Lewis
